

SANI-SORB

TRADITIONAL STYLE CAT LITTER ABSORBENT GRANULES

SANI-SORB is made from the finest proven clay deposits located in the Southwest. **SANI-SORB** has a natural reactive quality that absorbs moisture and odors in the litter box. The action granules are specially processed to work quickly.

SANI-SORB is all natural, 100% clay that has no deodorants or chemical additives. **SANI-SORB** is as fresh as the great outdoors and keeps the litter box dry and clean. Cats are attracted to this litter because it has a natural look and smell.

SANI-SORB cat litter is recommended for all breeds of cats no matter what their age. **SANI-SORB** is economical and easy to use. Start your kitten the natural way by introducing them to **SANI-SORB** cat litter today.

Indoor pets tend to live healthier, safer lives. It is less likely your cat or kitten will come in contact with ticks, fleas and harmful disease when they're indoors.

There are many homeless cats born everyday. Contact your animal shelter for information concerning spay and neuter programs. Help stop the suffering, "Adopt A Pet".

Directions For Use:

1. Fill the litter box with 2 to 3 inches of **SANI-SORB**. Level the absorbent granules by shaking the box back and forth.
2. Remove all solid waste and saturated granules.
3. Refill the box with fresh **SANI-SORB** to the original level.
4. Dispose of used cat litter properly. Use a sealed container and place in the trash.
5. Use protective gloves when handling feline waste and wash hands thoroughly.
